**Re: Burlington Resources Oil & Gas Company LP and ConocoPhillips Company
Response to 114 Information Request under the Clean Air Act
Facilities located within the Eagle Ford Shale
First Supplemental Response**

Dear Cynthia:

On behalf of Burlington Resources Oil & Gas Company ("Burlington") and ConocoPhillips Company, please refer to the enclosed compact disc for additional information regarding Burlington's response to EPA's Clean Air Act 114 information request dated May 8, 2014. The compact disc includes a revised Appendix 17. We referenced this submittal in the original narrative response on August 14, 2014. Appendix 17 is an Excel spreadsheet that includes three new spreadsheet tabs with information relating to the Dewitt Central Facility, George West Central Facility and Sugarkane Central Battery Facility.

Please note that the information relating to these Facilities is laid out in a format that differs from the other Facilities, and that no "SUB_CATEGORY" column is included. Unlike the other Facilities, the tracking systems used at Dewitt Central Facility, George West Central Facility and Sugarkane Central Battery Facility do not provide an indication of the cause of the shutdown. If you have questions about this response, please contact me.

Very truly yours,

Scott Janoe
